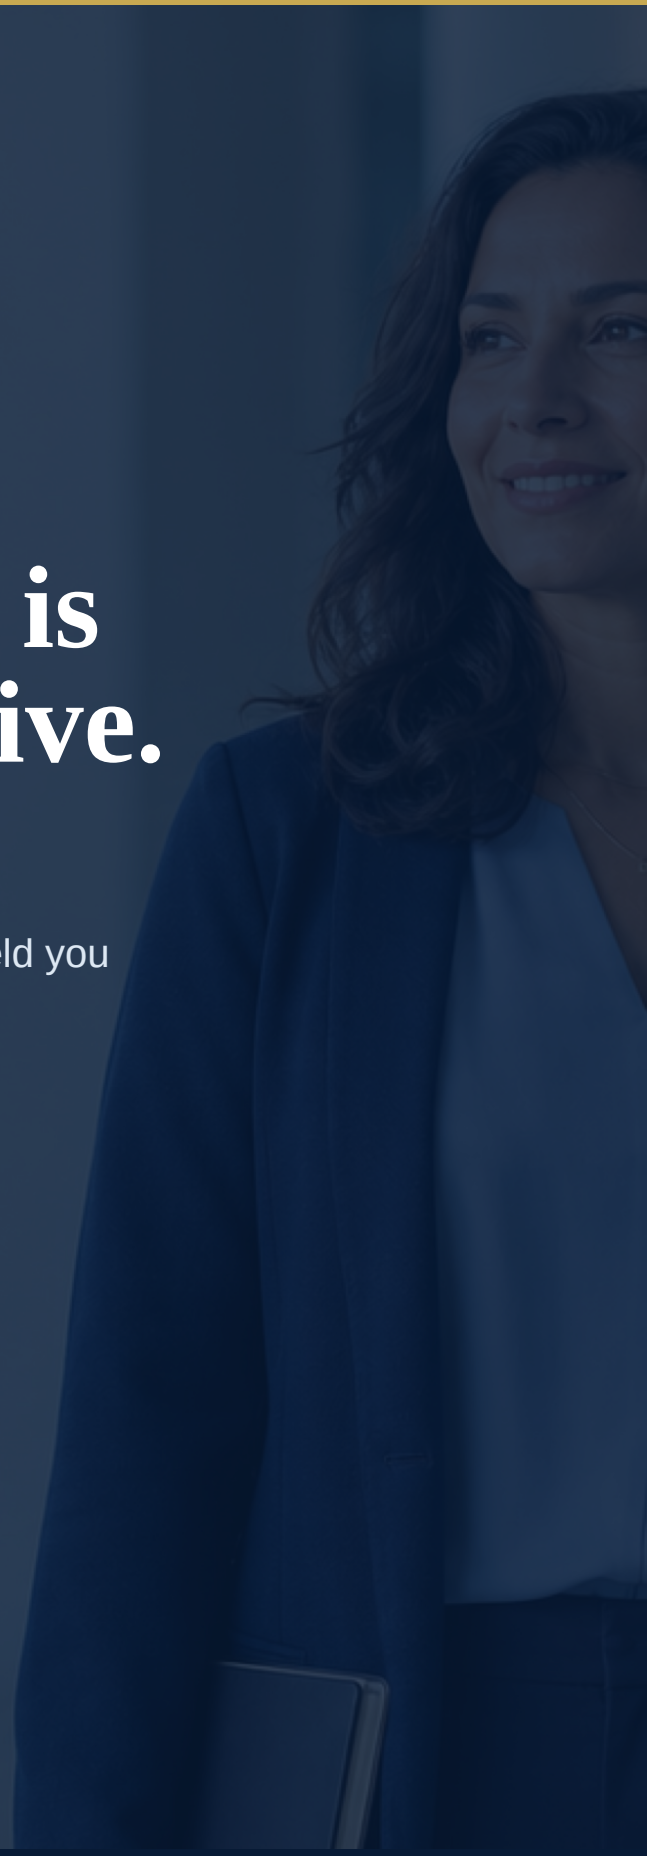
THE CGENAI® PROFESSIONAL CREDENTIAL FAMILY

Every profession is becoming AI-native.

Validated AI competence for the professional field you intend to lead.

Conferred by AIAI.
Grounded in society-developed Bodies of Knowledge, professional standards, and ethical obligations.



PROFESSIONAL KNOWLEDGE INFRASTRUCTURE

Bodies of Knowledge | Standards | Ethics | Assessment | Society

CGENAI®

A CREDENTIAL FAMILY FOR AI-NATIVE FIELDS

One shared foundation. Distinct domain expertise.

CGENAI® is AIAI's professional credential family. Each credential combines a common professional and technical AI core with the standards, methods, and responsibilities of a specific domain.

01

AIAI common core

AI and generative AI foundations
- Solutioning and developing knowledge
- Responsible AI, privacy, and governance
- Professional standards and ethical conduct

+

02

Society domain layer

Field-specific concepts and terminology
- Domain methods, workflows, and technical knowledge
- Professional responsibilities and ethical obligations
- Domain competencies, standards, and governance

VALIDATED OUTCOME

CGENAI® in your professional domain

A precise signal of validated competence - not a generic course-completion badge.

CHOOSE YOUR PROFESSIONAL FIELD

Multiple Pathways. One institutional standard.

Select the credential aligned with your work, responsibilities, and professional direction.

SAICI — OPEN

CGENAI® in Competitive Intelligence

Established through
Society for AI in Competitive Intelligence

Analysts, strategists, intelligence leaders, and decision-makers.

SAID — OPEN

CGENAI® in Diplomacy

Established through
Society for AI in Diplomacy

Diplomats, foreign-affairs professionals, policy leaders, and advisors.

AIAIQ — OPEN

CGENAI® in AI Strategy and Management

Established through
American Institute of Artificial Intelligence & Quantum

Executives, managers, consultants, and transformation leaders.

SAISC — COMING SOON

CGENAI® in Supply Chain Management

Established through
Society for AI in Supply Chain

Planners, procurement leaders, logistics professionals, and operators.

BUILT FROM FIRST PRINCIPLES

The Body of Knowledge is the foundation.

AIAI societies do more than collect AI use cases. They establish new professional fields from the ground up, defining the language, competencies, practices, standards, ethics, and responsibilities professionals need to work with rigor.

01

Defines the field

Creates a shared professional language, competency model, and scope of practice.

02

Anchors the credential

Provides the reference system for learning, preparation, examination, and conferral.

03

Governs professional practice

Connects standards and ethics to continuing responsibilities, discourse, and research.

04

Grounds intelligent tools

Informs domain-specific AI agents with the field's knowledge and policy framework.

A continuing professional institution. Education and assessment sit inside a larger society system of research, community, advocacy, governance, ethics, events, and professional tools.

HOW TO BECOME A CGENAI®

One clear path from interest to credential.

The journey brings together society membership, a field-defining Body of Knowledge, structured preparation, assessment, and continuing professional responsibility.

1

Choose your domain

Select the CGENAI® credential aligned with your work and professional direction.

2

Join the society

Become a member of the institution establishing and advancing your AI-native field.

3

Enter the pathway

Enroll for access to the applicable BoK, structured preparation, and exam attempt.

4

Prepare in ShareMax

Study inside AIAI's Digital Society OS alongside standards, research, events, and tools.

5

Demonstrate competence

Take the credential-specific exam and satisfy the applicable AIAI requirements.

6

Practice as a holder

Use the CGENAI® mark in your awarded domain and uphold continuing obligations.

Enrollment note: Society membership and the certification bundle are distinct purchases. Current pricing, inclusions, policies, and exam sessions are displayed in ShareMax before enrollment.

EXAM OVERVIEW

Assessment built around professional readiness.

Each exam measures the relevant Body of Knowledge - not attendance, memorized marketing claims, or course completion.

A Common core + domain blueprint

Shared professional AI foundations are assessed alongside the standards and technical knowledge of the chosen field.

B Applied professional judgment

Questions may test concepts, application, responsible decision-making, and scenario-based reasoning within the domain.

C Credential-specific policies

Format, timing, attempts, delivery, and examination rules are published for the credential and session selected.

D Learning and assessment are distinct

Preparation supports readiness. Assessment and AIAI requirements support credential conferral.

Candidate guidance: Use the current exam guide, blueprint, policies, and session details in your ShareMax environment.

OF ARTIFICIAL INTELLIGENCE

THE CONTINUING SOCIETY EXPERIENCE

More than preparation. More than an LMS.

ShareMax is AIAI's Digital Society OS: the operating environment in which members learn, connect, research, govern, and advance their profession.

Your society is the professional institution behind the credential.

Members move through an integrated professional ecosystem rather than a conventional course catalog.

LEARN	NETWORK	RESEARCH	ADVOCATE
GOVERN	UPHOLD	EVENTS	AI AGENTS

BoK-grounded intelligence: Domain agents are grounded in the relevant Body of Knowledge and policy framework - not presented as generic chatbots.

OF ARTIFICIAL INTELLIGENCE

CGENAI® FOR EMPLOYERS

Build a common capability language without losing domain depth.

Employer programs help organizations develop and validate AI-ready professionals within the context of the work they actually perform.

01	**Role-aligned pathways**	Match professionals to a relevant domain credential instead of one generic AI curriculum.
02	**Standards-based development**	Anchor learning and assessment in defined BoKs, responsibilities, and ethical expectations.
03	**Cohort administration**	Coordinate society access, preparation, examination pathways, and credential progress.
04	**Credible workforce signaling**	Communicate validated AI competence in specific professional domains.

BEGIN WITH THE PROFESSIONAL FIELD

Choose the CGENAI® that matches the professional - or workforce - you are building.
